

Product Specification Sheet

PC-11

PC-11 Premium Digital Photo Canvas - Satin

PC-11 is a premium satin finish polyblend canvas created for the professional photographer. Optimized for dye based inks, PC-11 has a fine weft and weave; a surface tooth structure which facilitates high resolution portraits and is extremely supple. It has extremely vivid color “pop” with dye based inks and very high resolution capability. Glides through smaller printers with tight head space and cuts with very little effort, often cutting in auto mode on many printers. Stretches and mounts with ease. This archival canvas is 100% acid free and will not yellow, crack or curl and is an ideal choice for a variety of applications including portraiture, fine art photography, and demanding art gicleé requirements.

Properties

Coating: Polymeric Non-toxic
Surface: White - Satin
Weave: 96 x 30 cotton/polyester blend
Caliper: .0192” (19.2 mil)
Weight: 367 g/m² (10.9 oz/yd²)
Whiteness (CIE Ganz 82): 106
Brightness (TAPPI T452): 93
Gloss (60°): 3.6

Ratings

Health – 0
Reactivity – 0
Flammability – 1 not spontaneously combustible

Environment

Functional temperature range – 50° to 85° Fahrenheit
Functional relative humidity range – 30% to 65%
Ink dry time – varies with type and amount of ink, relative humidity and temperature.

Inks

The inkjet coating of PC-11 is designed for use primarily with dye based inks. Although pigmented inks may be used with excellent results, a slight color gamut difference may occur absent color adjustment.

Applications

Portraits Fine Art Photography Art Gicleé

Handling & Storage

Store in cool, dry conditions around 70°F and 20-60% relative humidity
Always place in plastic sleeve when not in use. Never let roll lay flat on its side for extended period as damage could occur, store standing on end or suspended in box with end caps.
